

Air India Fare Master - Streamlit App

A machine learning powered Streamlit application that predicts Air India flight ticket prices based on route, stops, and duration.

Live Demo: <https://flight-price-predictor-1.streamlit.app>

GitHub Repo: <https://github.com/Ashish-s2/flight-price-predictor>

Key Features:

- Predict flight fares using ML regression
- Real-time INR to USD conversion
- Plotly-powered seasonal trend analysis
- Dark/light theme toggle
- Downloadable fare summary (HTML)
- Polished UI and animated card interface
